is set to focus on

Vietnam's Chemical Processing Industry

Two in-market stages - Hanoi and Ho Chi Minh City - have been set to provide international manufacturers and suppliers the opportunity to ride on the growing demand of Vietnam's chemical processing industry. Respectively, the two international exhibitions will serve the needs of entire Vietnam and its hinterland neighbours.

Anticipating a 14% annual growth from 2006 to 2010, huge amounts of investment on sophisticated and high technology products and equipment will be pumped into the Vietnamese's chemical industry to accelerate its development.

Therefore, be at the forefront of this growth phenomenon. Participate at the timely staged Chemtec Vietnam 2006 and Chemtec Vietnam 2007 to tap on the multitude of opportunities offered at this emerging and burgeoning market.
